

PROJECT MANAGEMENT PLAYBOOK

GET STARTED WITH AGILE PROJECT MANAGEMENT

Create an Agile project plan in Jira

INSTRUCTIONS: GETTING STARTED

Complete your assignment on the following slides

Set the share settings so **anyone with the link** can view the document

Submit the link to this deck in the Learning Management System

Tips for completing your assignment:

- Rename your copy and add your name to the file
Example: Playbook Assignment: Create a Project Brief-MRogers
- Read each slide carefully to ensure you complete the assignment successfully
- Review your playbook before submitting for accuracy, grammar and spelling
- Keep in mind the Guidelines for AI Use in the Course (located in the syllabus) when completing this assignment. You will indicate your AI use in the playbook on the last slide of this slide deck

Watch this video for a quick demo

INSTRUCTIONS: Introduction and background

For this Playbook, you will take on the role of project manager to integrate a rule-based chatbot into the Moodies customer service portal.

This initiative is pivotal in evolving our customer service capabilities, aiming to automatically handle the top 25% of our most frequently asked questions. Our existing system is strained under the increasing volume of customer interactions. Your leadership in this project will help scale the support system while maintaining the high-quality service our customers expect.

You will oversee the entire project scope, manage resources, and align the project with our strategic goals. You will create a Kanban space in Jira with epics that reflect the key milestones and user stories to reflect the work associated with each milestone. Lastly, you'll create a custom workflow with WIP limits.

REVIEW: Milestones

You've worked with stakeholders and the product owner to establish the following milestones for the chatbot integration project.

- **Milestone 1: Chatbot content development**
- **Milestone 2: Chatbot rules and logic**
- **Milestone 3: Technical integration**
- **Milestone 4: User experience and interface**
- **Milestone 5: Feedback and optimization**

You met with the development team to discuss the workflow to make sure the Jira space accurately reflects the team's process. You learn that rather than the three default statuses used in Jira, they have five: **TO DO, IN DEVELOPMENT, QA, DONE, and RELEASED**. You also discuss adding **work-in-progress limits** to ensure the team doesn't take on too much at once. You agree on a **WIP limit of three** for the **IN DEVELOPMENT** workflow stage.

COMPLETE: Create the Jira board

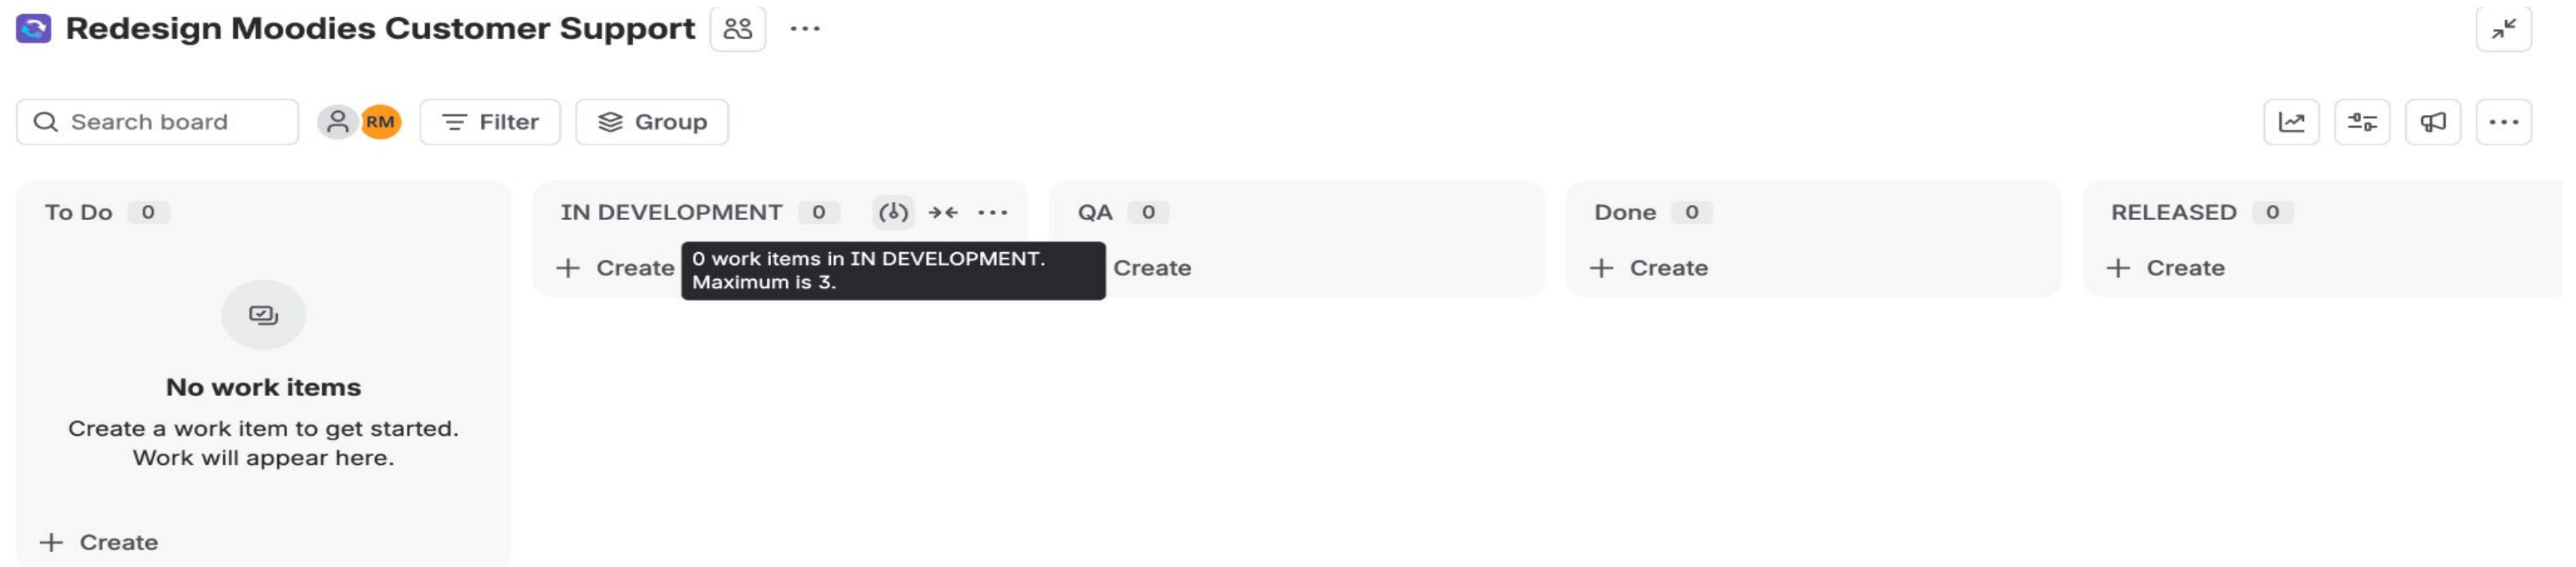

- Create a Jira **Kanban** space for the Moodies Chatbot.
- Create **epics** for the **five milestones** (listed on slide 4).
- After you've created each epic, go to the **Timeline view**.
- **Take a screenshot** of your screen in the **Timeline view** and insert it the space below.

The screenshot displays the Jira interface in the Timeline view for the 'Redesign Moodies Customer Support' space. The sidebar on the left contains navigation links for 'For you', 'Recent', 'Starred', 'Apps', 'Plans', 'Spaces', 'Filters', 'Dashboards', 'Teams', 'Projects', 'Goals', and 'Customize sidebar'. The main content area shows the space name 'Redesign Moodies Customer Support' with a search bar, a '+ Create' button, and a 'See plans' button. Below the space name are tabs for 'Summary', 'List', 'Board', 'Calendar', and 'Timeline'. The 'Timeline' tab is selected, showing a timeline view with a search bar, a user filter (RM), and a 'Filter' button. The timeline itself is a table with columns for dates (7, 8, 9, Aug 10, 11, 12, 13, 14, 15, 16, Aug 17, 18, 19, 20) and rows for tasks. The tasks are: 1. Chatbot content development (RMCS-1), 2. Chatbot rules and logic (RMCS-2), 3. Technical integration (RMCS-3), 4. User experience and interface (RMCS-4), and 5. Feedback and optimization (RMCS-5). Each task has a 'To Do' status dropdown. At the bottom right, there is a navigation bar with 'Today', 'Weeks' (selected), 'Months', and 'Quarters' buttons, along with an information icon and a right arrow.

	7	8	9	Aug 10	11	12	13	14	15	16	Aug 17	18	19	20
☐ Work														
☐ RMCS-1 1. Chatbot content development														
☐ RMCS-2 2. Chatbot rules and logic														
☐ RMCS-3 3. Technical integration														
☐ RMCS-4 4. User experience and interface														
☐ RMCS-5 5. Feedback and optimization														

COMPLETE: Create a custom workflow

- Update the **columns** in Jira to reflect the team's workflow (see slide 4).
- Add the **WIP limit** to the appropriate column.
- **Take a screenshot** of the **Board** view and insert it into the space below.

COMPLETE: Add user stories

During backlog grooming, the product owner prioritizes the **chatbot rules and logic** decision tree epic and breaks it down into the **user stories**, which are written out in [this document](#).

- Add each of these **user stories** to your Jira space.
- Update the **status** of each according to the following:
 - The team has already **completed** the first **user story** and it's **ready for QA**.
 - The second and third are **in development**.
 - The fourth **hasn't been started yet**.
- **Take a screenshot** of the **Board** view and insert it into the space below. It's ok if it goes outside the slide borders.

COMPLETE: AI use in the playbook

Per the course AI guidelines you are required to indicate where and how AI tools were used in your assignments (e.g., idea generation, drafting, proofreading, etc.). Please complete the following:

Question	Answer
Did you use AI when completing this assignment?	No
If yes, explain how you used AI tools to assist you in completing the assignment. Include where you used it.	

INSTRUCTIONS: SUBMIT IT

Review each slide and make sure you have completed the entire assignment

Set share settings so **anyone with the link** can view the document

Access the correct assignment submission page in the Learning Management System

Copy/Paste the link to your assignment in the system by the due date.

Confirm the assignment was accepted by the Learning Management System

How to set share settings:

- Click "Share" in the upper right corner
- Under "General Access", select "**anyone with the link**"
- Click "Copy" and then "Done"
- Paste the link in the correct assignment submission page in the LMS
