

PROJECT MANAGEMENT PLAYBOOK

MANAGE BUDGET, COST, AND RESOURCES

Create a project budget

INSTRUCTIONS: Getting started

Complete your assignment on the following slides

Set the share settings so **anyone with the link** can view the document

Submit the link to this deck in the Learning Management System

Tips for completing your assignment:

- Rename your copy and add your name to the file
Example: Playbook Assignment: Create a Project Brief-MRogers
- Read each slide carefully to ensure you complete the assignment successfully
- Review your playbook before submitting for accuracy, grammar and spelling
- Keep in mind the Guidelines for AI Use in the Course (located in the syllabus) when completing this assignment. You will indicate your AI use in the playbook on the last slide of this slide deck

INSTRUCTIONS: Introduction and background

You work at a shoe company called "Moodies." Moodies sells shoes that change color based on your mood. They sell two distinct products: shoes for kids and shoes for adults. There's huge demand, and you're getting a ton of questions about your shoes.

Leadership has informed you that they want to redesign the customer support experience to help customers get their questions answered more quickly and efficiently. There is an existing website with frequently asked questions (FAQ) and corresponding answers and a customer support email address that customers can write to with questions.

Using the information you have about the project below, complete the following slides to **build budget and strategy documents**.

Once you complete the assignment slides, you'll **have a clear detailed budget, a strategy to negotiate with vendors, and a resource management strategy plan** as if you were preparing to speaking to a room full of project stakeholders.

- [*List of employees, titles and hours available*](#)
- [*Moodies' budget template*](#)
- [*Recent email from CEO*](#)

REVIEW: Project team

A cross-functional project team will drive the customer service redesign project.

Name	Project Role	Cost Per Hour	Hours needed for the project	Available hours for this project
Melinda Carlyle	Product Owner	\$100	50	60
Naomi Brown	Product Lead	\$80	50	65
Radha Manjunath	Project Manager	\$80	50	52
Hans Hindleman	Designer	\$50	100	75
Andy Adler	Content Author/editor	\$50	215	115
Stu Sampson	Quality Assurance	\$50	115	132
Alex Samsonite (Manager of team)	Customer Service Team	\$22.5	380	460
Diana Delaney	Software Engineer	\$150	30	60

COMPLETE: Estimate costs

- Estimate the costs associated with each project component and activity.
- Utilize cost estimation techniques such as top-down estimation, or bottom-up estimation.
- Use the [Moodies' budget template](#) as a working document, then enter your contingency in the response column.

QUESTION	RESPONSE
What is the dollar amount for your contingency?	12,500
What estimation technique did you use and why?	I used the bottom-up estimation technique , because the project provides detailed resource rates, required hours, and available hours. I calculated each resource cost individually and added the fixed costs for the chatbot, testing tools, and coding library. This approach provides a detailed estimate and identifies resource gaps requiring contractors.
What is the dollar amount for your net profit?	42,325

COMPLETE: Build the budget

Create a detailed project budget for Moodies.

- Consider various cost elements, including personnel, product design, and miscellaneous expenses.
- Use the [Moodies' budget template](#) as your working document.
- Take a screenshot of your completed budget and **paste it below**.

Budget Assumption Rationale:

No costs were provided for Development Software Licenses, Development IDEs, or Hardware. Therefore, these fields were left blank rather than assigning assumed costs, ensuring the budget reflects only the confirmed project information.

COMPLETE: Build the budget

27		Total Expenses	82,675.00		82,675.00
28		Net Profit	42,325.00		17,325.00

COMPLETE: Develop a resource management plan

Develop a plan for managing project resources efficiently. Consider resource allocation, resource leveling, and resource optimization strategies.

QUESTION	RESPONSE
What is your backup plan if an employee is out sick?	If an employee is unexpectedly unavailable, first we identify the tasks that are time-sensitive or on the critical path. Reassign those tasks to a cross-trained team member who has available capacity. If no internal resource has sufficient capacity, use the approved contractor/vendor as a backup. Non-critical tasks can be rescheduled until the employee returns.
What is your backup plan if one milestone isn't getting completed on time?	If a milestone is delayed, I will first identify the cause and assess its impact, then reallocate available resources or contractors to critical tasks, prioritize essential work, and adjust the schedule where possible. I will communicate the delay and recovery plan to stakeholders and escalate for additional resources, budget, or scope adjustments if needed.

Try running some of these scenarios through your favorite AI tool. Compare your self-generated responses vs. AI's responses to help refine your submission. (Optional)

COMPLETE: Develop a resource management plan

How do each of your backup plans affect the budget?

Effect of Employee is out sick, on budget:

Use existing team capacity first to avoid additional costs. If a contractor is needed, the additional contractor hours will increase the project cost.

Effect of Milestone delayed, on budget:

Reallocate existing resources first at no additional cost. If additional resources or schedule acceleration are required, use the contingency budget to cover the additional costs while protecting the \$25,000 profit goal.

COMPLETE: Negotiate with vendors

PLAN DETAIL	YOUR RESPONSE AND ANALYSIS
How do you plan to negotiate prices and timeline with vendors? Using the tactics covered in the module, create an email draft to a content editing vendor for a deal on purchasing hours in bulk (bulk meaning more than a typical 10–20 hours). Enter your response in the right column. Feel free to use this intro to get you started! <i>Hi ____,</i> <i>Thank you for submitting your quote, as you know, we greatly enjoy working with you. I'd like to further discuss...</i>	Hi [Vendor Name], Thank you for submitting your quote. We greatly value the quality of your content editing services and the value you have brought to our projects in the past. We are currently considering proposals from multiple vendors. We need 100 additional content editing hours, and because we are committing to a larger block of hours, would you be willing to offer a bulk discount on your hourly rate? In addition, we would like to discuss a priority turnaround schedule so that the editing work can be completed in time to support our project milestones. Could you also share your revision or warranty terms and any additional services you could include as part of the bulk engagement? We hope to find a mutually beneficial arrangement and look forward to discussing options with you. Best regards, Radha Manjunath Project Manager, Redesign Moodies customer support

COMPLETE: AI use in the playbook

Per the course AI guidelines you are required to indicate where and how AI tools were used in your assignments (e.g., idea generation, drafting, proofreading, etc.). Please complete the following:

QUESTION	ANSWER
Did you use AI in any parts of the project beyond the recommendation sections?	YES
If yes, explain how you used AI tools to assist you in completing the assignment. Include where you used it.	I first completed the assignment independently using my own critical thinking and understanding of the project scenario. After drafting my responses, I used ChatGPT to review my work, identify any gaps and suggest improvements to the clarity, grammar, and organization of my answers.

INSTRUCTIONS: SUBMIT IT

Review each slide and make sure you have completed the entire assignment

Set share settings so **anyone with the link** can view the document

Access the correct assignment submission page in the Learning Management System

Copy/Paste the link to your assignment in the system by the due date

Confirm the assignment was accepted by the Learning Management System

How to set share settings:

- Click “Share” in the upper right corner
- Under “General Access”, select “**anyone with the link**”
- Click “Copy” and then “Done”
- Paste the link in the correct assignment submission page in the LMS
